JOINT BUSINESS PLAN · FY27

Walmart — FY27 Joint Business Plan

Acme Corp × Walmart · recovering facings, closing the endcap gap, winning protein

Document type Retailer joint business plan
Period FY2027 (built H2 FY26)
Owner Marcus Boudreaux, Sales; Walmart team (Tom Reilly, NAM)
Prepared June 2026

Acme sales at Walmart (FY25)	**$184M · 21.4% of Acme ACV**
Account status	**#1 customer · Tier 1 cornerstone**
Live issue — LA endcaps	**23 of 41 Supercenters: 3 Larksfield, 0 Acme**
Live issue — protein	**Acme Wellness Protein share 5.2% (vs 18.4% at Target)**
Best-in-class lever	**Walmart Connect retail media — 1.20 incrementality**
FY27 joint theme	**Facing recovery · Pack Refresh · protein · retail media**

Executive summary

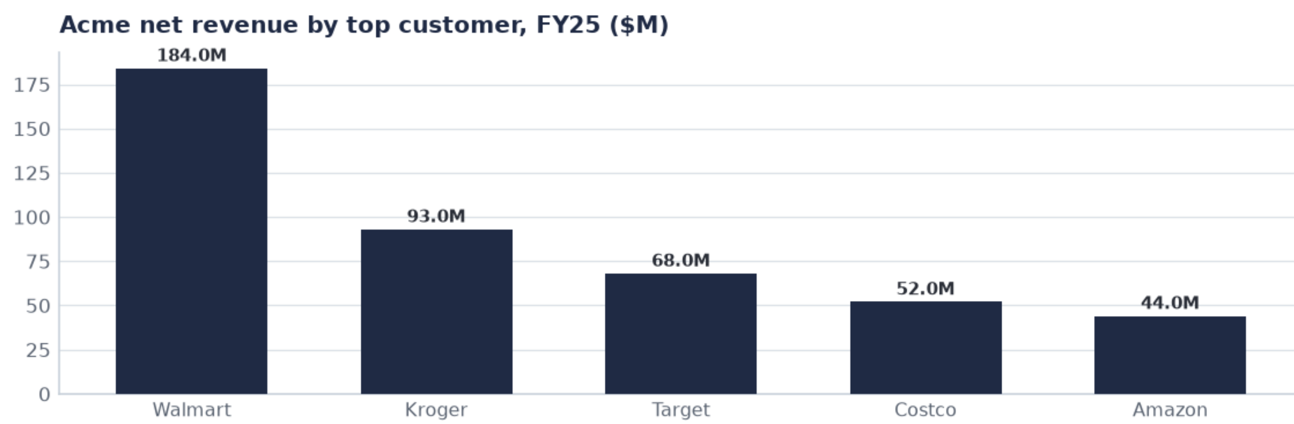
Walmart is Acme's largest customer at $184M in FY25 net revenue — 21.4% of the company's ACV-weighted distribution and the single account that most moves the enterprise number. The relationship is fundamentally healthy, but three specific, fixable problems are costing both partners growth: the September 2025 modular reset cut Crunchwell Mega from 8 to 6 facings and became the primary driver of Louisiana's share collapse; a Louisiana endcap deficit now runs 3 Larksfield to 0 Acme in 23 of 41 audited Supercenters; and the ProteinPeak Walmart-pilot is underperforming at 78% of trial plan while the same brand over-indexes at Target. The FY27 plan is built to fix all three and to scale the one lever that is working best of any retailer — Walmart Connect.

- **Recover the base.** The Louisiana driver is a Walmart execution issue we can jointly reverse — facing recovery on Crunchwell Mega and endcap parity against Larksfield.
- **Land the Pack Refresh.** Crunchwell's Hero-SKU Pack Refresh (a $28M year-one plan, on-shelf 15 Aug 2026) is the biggest near-term innovation; Walmart distribution timing is the ask.
- **Fix protein.** Acme holds only 5.2% Wellness Protein share at Walmart against a $840M, +18% category — the assortment gap, not demand, is the constraint.
- **Scale what works.** Walmart Connect returned $1.20 incremental per $1 in Q1 — the best of any platform — and is the funded engine for FY27 (see the CFO read, Report 40).

1 · Account scorecard

ACME SALES (FY25)	PRIORITY TIER	RETAIL-MEDIA INCR.	LA PROTEIN SHARE
$184M	**Tier 1**	**1.20**	**5.2%**
21.4% of Acme ACV	cornerstone account	Walmart Connect, best-in-class	vs 18.4% at Target

Walmart is a cornerstone account and the largest line in Acme's customer book. The joint task for FY27 is not to reinvent the relationship but to remove three drags on a base that is otherwise sound: a shelf-set that has moved against Crunchwell in the South, a protein assortment that under-serves the fastest-growing pocket in the category, and a media investment that — uniquely at Walmart — is already paying back above 1.0.



Walmart alone is roughly the sum of the next two accounts. Source: seed_retailers.

2 · The Louisiana shelf: reset & endcap deficit

The September 2025 modular reset cut Crunchwell Mega from 8 facings to 6 in Louisiana Supercenters. That single change is the largest identified driver of Crunchwell's Louisiana share collapse — from ~6.4% to 3.0%, a –340 bps move detailed in the South Region review (Report 39). The situation has since worsened at the endcap. In the May 2026 audit of 41 Louisiana Supercenters, 23 carried three Larksfield (Field & Honey) endcaps and zero Acme endcaps; across all 47 doors audited, Acme held zero secondary displays against 111 for Larksfield.

2.1 · Walmart LA endcap audit — May 2026

Metric	Larksfield (Field & Honey)	Acme (Crunchwell)
Supercenters audited	41	41
Total endcaps held	105	0
Stores with 3 endcaps / 0 endcaps	23 with 3	23 with 0
Crunchwell Mega facings (avg)	—	4 (was 8 pre-reset)

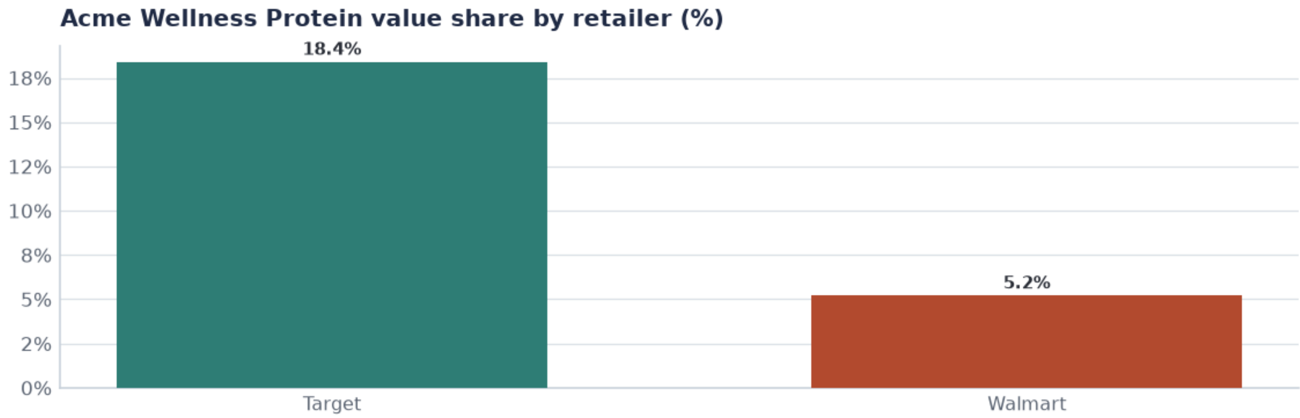
Acme has been progressively displaced at the Walmart LA endcap since the September reset. May 2026 figures are per-Supercenter averages across 41 stores. Source: walmart_endcap_audit_la.

> **The endcap deficit is the recovery lever**
> Rouses OOS and Larksfield promo intensity matter, but the Walmart endcap is where the share is being lost fastest. FY27 Leg 1 is a joint commitment to Crunchwell Mega facing recovery (6→8) and at least one Acme endcap in every LA Supercenter through the key windows.

3 · The protein gap: Walmart vs Target

Wellness Protein is the category's fastest-growing pocket — $710M in FY24 to $840M in FY25 (+18.3%), tracking +18.6% MTD in Q2 FY26. Acme's national share is building fast behind ProteinPeak, but the retailer split is stark: Acme holds 18.4% Wellness Protein share at Target and just 5.2% at Walmart. The ProteinPeak Walmart-pilot (Cinnamon Crunch, launched 27 Apr 2026) is running at 78% of trial plan against 113% at Target. This is an assortment and execution gap, not a demand problem — Walmart shoppers buy protein cereal, they just do not find Acme's on shelf.



A 13.2-point retailer gap on the fastest-growing pocket in cereal. Source: seed_category_market_size (Q2-FY2026-MTD).

4 · Retail media — Walmart Connect is the portfolio leader

Platform	Spend (Q1)	Incremental	Incr. ratio	FY27 call
Walmart Connect	$1.0M	$1.21M	1.20	Scale
Kroger Precision Marketing	$0.4M	$0.32M	0.77	Hold
Target Roundel	$0.4M	$0.22M	0.50	Reallocate
Amazon Ads	$2.4M	$0.98M	0.40	Reallocate

Walmart Connect returned $1.21M incremental on $1.0M of Q1 spend — a 1.20 ratio, the best of any platform and the only one above break-even at scale. The FY27 plan reallocates media out of Amazon Ads (0.40, a drag) and into Walmart Connect, targeting the Louisiana recovery and the Pack Refresh launch window (see the CFO read, Report 40, for the H2 reallocation of ~$700K).

5 · FY27 joint targets & the ask

The FY27 joint business plan is built on four commitments. The revenue figures below are planning targets, not booked business, and are contingent on the shelf and media actions landing in-window.

FY27 joint workstream	Commitment	Owner
Facing recovery	Crunchwell Mega 6→8 facings, LA Supercenters	Boudreaux / Reilly
Endcap parity	≥1 Acme endcap per LA Supercenter, key windows	Boudreaux / Reilly
Pack Refresh distribution	Hero-SKU Pack Refresh on-shelf 15 Aug 2026 ($28M yr-1 plan)	Audrey Kim
Protein assortment	Close the 5.2%→Target-benchmark gap; ProteinPeak items	Sage Park
Retail media	Scale Walmart Connect; fund LA recovery at 2.2× ROI	Tasha Brooks

FY27 risk — Larksfield is escalating on two fronts
Field & Honey launched a 14g-protein line extension (LCH00032) on 12 May 2026, pressing the protein and Louisiana battles simultaneously. If the September 2026 reset does not restore Crunchwell facings and grant Acme endcaps, the Louisiana base does not recover and the protein gap widens. Reset timing is the single highest-leverage joint decision for FY27.

Recommendations & next steps

#	Action	Owner	When
1	Restore Crunchwell Mega to 8 facings and secure ≥1 Acme endcap per LA Supercenter at the Sept 2026 reset.	Marcus Boudreaux / Tom Reilly	Sept 2026 reset
2	Confirm Pack Refresh Hero-SKU distribution and timing to hold the 15 Aug 2026 on-shelf date.	Audrey Kim / Walmart team	Aug 2026
3	Build a ProteinPeak Walmart assortment plan to close the 5.2%→18.4% share gap vs Target.	Sage Park	FY27 line review
4	Scale Walmart Connect and direct the H2 media reallocation into LA recovery (2.2× ROI).	Tasha Brooks	H2 FY26 → FY27
