

QUARTERLY BUSINESS REVIEW

Acme Corp — Q1 FY2026 Company Business Review

Enterprise performance across all six brands and four regions

Document type Internal quarterly business review
Period Q1 FY2026 (Jan–Mar 2026)
Owner Diane Halverson, VP Sales NA (sponsor); Finance & Insights (prep)
Prepared April 2026

Net revenue vs plan (Q1)	\$181.1M actual vs \$191.2M plan · -5.3%
FY25 net revenue	\$812M (+5.1% YoY)
EBITDA margin	14.2% (target 16% by FY28)
Biggest miss	ProteinPeak –25% (pre-launch); Crunchwell LA –340 bps
Headline call	Hold the number for FY26 on the Q2 ProteinPeak launch

Executive summary

Acme closed Q1 FY2026 at \$181.1M net revenue, -5.3% behind the \$191M plan — a shortfall concentrated in two known, well-understood places rather than a broad-based demand problem. National RTE-cereal share held at 7.9% (Acme all-brand), category dollars grew +1.1%, and four of six brands landed within 2 points of plan. The gap is Crunchwell's Louisiana share erosion and a ProteinPeak line that is being deliberately under-shipped ahead of its April 20 relaunch.

- **The number:** Q1 net revenue \$181.1M vs \$191.2M plan (-5.3%). The trajectory improves through the quarter as ProteinPeak launch pipe fills.
- **Crunchwell Louisiana** is -340 bps of local share (a five-hypothesis root cause: Walmart reset, Larksfield promo intensity, Hurricane Tonya supply, private label, Hispanic-shopper shift). Recovery plan is scoped and funded for Q2.
- **ProteinPeak** ran -25% to plan in Q1 by design — the +\$32M FY26 build sits on the Cinnamon Crunch and Cocoa Almond launch that ships from April 20.
- **Spend efficiency** is the watch-item for the CFO: Q1 retail media returned \$0.65 incremental per \$1, dragged by Amazon Ads; trade incrementality sits at 0.52.

1 · Enterprise scorecard

NET REVENUE (Q1) \$181.1M -5.3% vs plan	RTE SHARE (ACME, NATL) 7.9% flat vs LY	CATEGORY \$ GROWTH +1.1% RTE total US	RETAIL-MEDIA ROI \$0.65 incremental per \$1	FILL RATE 94.9% storm-recovered
--	---	--	--	--

The scorecard reads amber, not red. Revenue is behind plan, but share, distribution and brand equity are broadly stable, and the two sources of the miss are both actively managed. The quarter's job was to keep the base intact while pre-loading the Q2 innovation; that job was done.

Brand net revenue vs plan — Q1 FY2026

Brand	Plan	Actual	Var %	Status
Crunchwell	\$75.6M	\$71.1M	-5.9%	Watch
TrailGrove	\$38.1M	\$37.5M	-1.7%	On track
MorningOats	\$23.3M	\$23.1M	-1.1%	On track
HoneyNest	\$20.4M	\$20.2M	-1.1%	On track
ProteinPeak	\$17.4M	\$13.0M	-25.4%	Action
RootDay	\$16.4M	\$16.3M	-0.4%	On track
Total Acme	\$191.2M	\$181.1M	-5.3%	Amber

Source: plan_vs_actual (SAP/Acme ERP shape), Q1 FY2026 periods.

Four of six brands within 2 pts of plan. ProteinPeak's gap is a planned pre-launch draw-down.

2 · Share & category context

National share is stable: Acme all-brand value share holds at 7.9%, Crunchwell at 6.0%, and Larksfield — the share gainer nationally and the aggressor in the South — at 14.0%. The category grew +1.1% in dollars, led by Wellness Protein (+17%) and dragged by Kids Sweet (–3%). The strategic read: our share problem is regional (Louisiana) and segment-shaped (protein, where we under-index), not a national franchise decline.

National RTE-cereal value share (%)

Segment mix is the real story

Wellness Protein is the category's fastest-growing pocket at +17–18% and now \$840M. Acme holds 7.6% and is building fast behind ProteinPeak. Family Sweet — where Crunchwell lives — grows +1.4%. Where we play determines how hard we have to run.

3 · The two problems, sized

3.1 · Crunchwell Louisiana — –340 bps of local share

Crunchwell's Louisiana DMA share fell from ~6.4% (Q4 FY24 Mass/Grocery peak) to 3.0% in Q1 FY2026. Root cause is now attributed across five hypotheses: the Walmart September modular reset that cut Crunchwell Mega from 8 to 6 facings (~55%), Larksfield promo intensification at Rouses (~20%), the Hurricane Tonya supply collapse that dropped Houston-DC fill to ~52% (~12%), Walmart private-label pressure (~8%), and a Hispanic-shopper mix shift (~5%). A three-leg recovery is funded for Q2: facing recovery, targeted trade, and a LA retail-media injection at 2.2× the portfolio ROI.

3.2 · ProteinPeak — a planned Q1 trough before the Q2 build

ProteinPeak ran –25% to plan in Q1 because the \$48M→\$80M FY26 build is loaded onto two new SKUs — Cinnamon Crunch (PP005) and Cocoa Almond (PP006) — that did not ship until April 20. The Q1 miss is the pre-launch pipeline draw-down, not a demand signal; the launch read (Report 12 / 02) shows trial at 110% of plan at Target in the first four weeks.

4 · Commercial & spend efficiency

Retail-media incrementality — Q1 FY2026

Platform	Spend	Incremental	Incr. ratio	Call
Amazon Ads	\$2.4M	\$0.98M	0.40	Reallocate
Walmart Connect	\$1.0M	\$1.21M	1.20	Reinvest
Kroger Precision Marketing	\$0.4M	\$0.32M	0.77	Reallocate
Target Roundel	\$0.4M	\$0.22M	0.50	Reallocate
Total retail media	\$4.2M	\$2.73M	0.65	Rebalance H2

The CFO's question — “is the working-media dollar working?” — has a clear Q1 answer: Walmart Connect (1.20) and Kroger Precision (0.77) carry the portfolio; Amazon Ads (0.40) is the drag. The blended \$0.65-per-\$1 return funds a proposed H2 reallocation out of Amazon and into Walmart/Kroger and the Louisiana recovery, detailed in the CFO effectiveness read (Report 40 / 05).

5 · Risks & the Q2 ask

Watch-items into Q2

(1) ProteinPeak launch execution at Walmart-pilot, tracking behind Target. (2) Field & Honey's 14g-protein line extension (LCH00032, May 12) escalates the LA and protein fronts simultaneously. (3) Retail-media efficiency must improve before H2 budget is committed.

Recommendations & next steps

#	Action	Owner	When
1	Fund and launch the Crunchwell Louisiana three-leg recovery (facings, trade, LA retail media at 2.2× ROI).	Marcus Boudreaux	Q2 — now
2	Protect the ProteinPeak launch: close the Walmart-pilot execution gap; hold Target momentum.	Maya Chen / Sage Park	Wk 4–12
3	Reallocate H2 retail media out of Amazon Ads into Walmart Connect, Kroger, and LA.	Tasha Brooks	H2 planning
4	Hold the FY26 number: reaffirm \$80M ProteinPeak target contingent on Week-8 read.	Finance / Diane Halverson	May MBR
