

Costco / Club Channel — FY27 Line Review & Joint Business Plan

Costco, Sam's Club & club channel · pack architecture, item count, the value equation

Document type Club channel line review
Period FY2027
Owner Club Channel Sales (Frank Calabrese, NAM)
Prepared June 2026

Costco (FY25)	\$52M · Tier 1 (Club)
Sam's Club (FY25)	\$28M · Tier 2 (Club)
Club channel total	~\$80M Acme (Costco + Sam's)
Club dynamics	Limited SKU count · big-pack value · treasure-hunt · membership
Pack architecture bet	Crunchwell Mega Family Pack 36oz (\$8.5M yr-1 plan, 2027-Q1)
Data caveat	Club-level splits are planning estimates — see §4

Executive summary

The club channel — Costco at \$52M and Sam's Club at \$28M in FY25, roughly \$80M of Acme net revenue combined — plays by different rules than mass and grocery: a deliberately limited item count, a big-pack value equation, treasure-hunt merchandising, and a membership base that rewards trip-worthy value. Acme wins in club where it brings a distinct pack architecture (MorningOats Cup is the current hero) and loses where it simply ships mass SKUs into a club box. The FY27 line review is a pack-architecture argument: a Crunchwell Mega Family Pack 36oz built for the club value equation, TrailGrove and RootDay multipacks, and a ProteinPeak club variety pack to carry the fastest-growing pocket into the channel. Club-level financial splits in this document are planning estimates; the dataset carries limited club-granular history and we flag it explicitly.

- **Club is a pack-architecture channel.** Item count is scarce; each SKU must earn its slot on pack size, value-per-ounce, and trip appeal — not brand breadth.
- **The headline bet.** Crunchwell Mega Family Pack 36oz (\$8.5M year-one plan, 2027-Q1 prototype) is purpose-built for the club value equation.
- **Carry protein into club.** A ProteinPeak club variety pack brings the +18% Wellness Protein pocket into the channel; TrailGrove/RootDay multipacks extend the same logic.
- **Planning-estimate flag.** Costco and Sam's are \$52M/\$28M in the retailer master, but club-level brand/pack splits below are modelled planning estimates, not measured club POS.

1 · Club channel scorecard

COSTCO (FY25)	SAM'S CLUB (FY25)	CLUB TOTAL	CURRENT HERO
\$52M Tier 1 · Club	\$28M Tier 2 · Club	~\$80M Costco + Sam's	MorningOats Cup club value SKU

Costco and Sam's Club together carry roughly \$80M of Acme net revenue. Both are club-format accounts: a curated item count in the low single digits per category, a big-pack/value merchandising model, and treasure-hunt discovery that rewards genuinely differentiated pack architecture. MorningOats Cup is Acme's current club hero; the FY27 line review is about earning more of the scarce club slots with packs designed for the channel rather than adapted from mass.

Costco leads the channel; Sam's is the growth seat. Source: seed_retailers.

2 · Pack architecture — the FY27 argument

Club rewards value-per-ounce and pack distinctiveness. Acme's mass architecture tops out at 18oz (Crunchwell Mega); club buyers reward a bigger, better-value pack. The FY27 line review leads with the Crunchwell Mega Family Pack 36oz — a Stage-3 prototype carrying an \$8.5M year-one plan and a 2027-Q1 target — doubling the current Mega pack size into the club value equation. Multipack formats (TrailGrove bars, RootDay cartons) and a ProteinPeak variety pack complete the argument.

2.1 · Current largest packs vs the club opportunity

Largest active packs today	Pack size	Shelf price	Tier
RootDay Coconut Blend	32 oz	\$4.99	Premium
RootDay Almond Vanilla	32 oz	\$4.49	Premium
RootDay Almond Original	32 oz	\$4.49	Premium
RootDay Oat Milk Unsweetened	32 oz	\$4.99	Premium
RootDay Oat Milk Chocolate	32 oz	\$4.99	Premium
RootDay Oat Milk Vanilla	32 oz	\$4.99	Premium

Today's largest single-pack in the branded cereal line is 18oz. The proposed Crunchwell Mega Family Pack 36oz is a purpose-built club doubling; RootDay already ships a 32oz carton that multipacks cleanly, and TrailGrove/ProteinPeak run 6-count formats that lend themselves to club variety packs.

The 36oz Family Pack is the missing rung on the club value ladder. 36oz figure is a planning-estimate concept spec. Source: skus, innovation_pipeline.

Innovation status — planning, not booked

Crunchwell Mega Family Pack 36oz is a Stage-3 prototype with a \$8.5M year-one revenue plan and a 2027-Q1 target (confidence 0.62). It is a plan, not committed distribution. See the RGM / price-pack architecture read, Report 17.

3 · FY27 club item plan

The FY27 club item plan concentrates Acme's scarce slots against the value equation and the growing pockets. Revenue figures are club-level planning estimates, not measured club POS.

FY27 club item candidate	Format	Club rationale	Status
Crunchwell Mega Family Pack 36oz	Big-pack single	Value-per-oz; treasure-hunt	Plan (\$8.5M yr-1)
ProteinPeak club variety pack	Multipack	Carry +18% protein into club	Concept
TrailGrove bars multipack	6-ct+ multipack	Snacking value; current variety-pack pull	Extend
RootDay oat-milk multipack	Carton multipack	32oz cartons multipack cleanly	Extend
MorningOats Cup club pack	Cup multipack	Current club hero; single-serve +9.8%	Grow

Source: *innovation_pipeline, skus, category_market_size (single-serve cups +9.8%)*. Item-level club economics are planning estimates.

The value equation is the club buyer's decision rule: does this pack deliver enough value-per-ounce and trip appeal to earn one of a handful of slots? Acme's FY27 answer is bigger packs on Crunchwell, variety packs on protein and snacking, and a defended MorningOats Cup position.

4 · Data caveat & FY27 line-review asks

Club-level data is limited — treat splits as planning estimates

The Acme dataset carries robust account totals (Costco \$52M, Sam's \$28M from the retailer master) but limited club-granular POS. Brand-by-pack club splits, the 36oz pack economics, and item-level club revenue in this review are modelled planning estimates for line-review discussion, not measured club-channel history. Any FY27 commitment should be conditioned on a club-specific data build.

Recommendations & next steps

#	Action	Owner	When
1	Lead the FY27 club line review with Crunchwell Mega Family Pack 36oz built for the club value equation.	Club Channel Sales / Frank Calabrese	FY27 line review
2	Propose a ProteinPeak club variety pack to carry the +18% protein pocket into the channel.	Sage Park	FY27 line review
3	Extend TrailGrove and RootDay multipacks; defend and grow the MorningOats Cup club position.	Club Channel Sales	FY27
4	Commission a club-specific POS/data build before booking any FY27 club revenue plan.	Insights / Finance	H2 FY26
